French Pruning Shears—Improved. Have just received a shipment direct from France. They have been improved. The frames are extra heavy, the shoulders more pronounced, giving a better grip. These improved shears are the best all 'round, for nurserymen. For making cuttings we use the 8 inch, but for extra heavy work, cutting back seedlings to the bud, etc., the 9 inch is preferable. We have used this make of shears for eighteen years and our last importation is the best lot we have ever received.
